

Date: March 6, 2017

Winner of the 7th National Award for "Technology Innovation in various Field of Petrochemicals and Downstream Plastic Processing Industry 2016-17".

Windsor Machines Limited (the Company) is pleased to inform that, it's "KL Two Platen Machine Design" based on Italtch Technology; has won the 7th National Award (2016 - 17) for Technology Innovation in various field of Petrochemicals & Downstream Plastic Processing Industry organized by Ministry of Chemicals & Fertilizers.

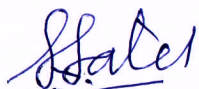

Windsor Machines Ltd. acquired "ITALTECH" (a leader in the manufacturing of large size Injection Molding machinery based in Italy) around Three years back. Our dedicated TEAM of Engineers have imbibed this advanced technology and successfully reproduced the same at our plant in Gujarat.

These New-Generation machines have been successfully launched and widely accepted in the Indian market. Last year we have sold more than 30 machines in the highly competitive and demanding Indian market.

This new technology has opened the doors for Indian Plastic processors to avail European Technology at affordable competitive prices. Moreover, it gives lot of benefits to the processors in terms of flexibility in operations, higher reliability, reduction of foot-print, ease of maintenance, extended mold life and reduced energy consumption.

On this joyous occasion, Windsor Management Team would like to express its sincere thanks and Gratitude to all its Employees, Collaborators, Overseas Colleagues, Customers, Suppliers, Vendors, Stake Holders, Bankers and Financial Institutions for extending their continued support to Windsor and believing in the fact that Windsor can and will do it.
